DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jason H. Rosenblum on October 4, 2010.

The application has been amended as follows:

---Please replace currently amended claim 38 with the following:

An ink jet print head comprising a print head matrix, the matrix having a plurality of nozzles for bubble formation and expulsion, said nozzles opening onto a print side surface of said matrix, the matrix further comprising a plurality of local reservoirs, wherein each of said local reservoirs is configured to supply ink to nearby ones of said nozzles at atmospheric pressure by capillary action, wherein said capillary action is unaided by compression, said local reservoirs opening onto an ink supply surface of said matrix and such that each one of said local ink detaining storage reservoirs supplies ink from said ink supply surface to a single respective one of said nozzles wherein said matrix is arranged into a substantially rectangular printing area dimensioned to give simultaneous printing coverage of standard sized printing media upon being

placed substantially over said standard sized printing media, and arranged for said printing on said standard sized printing media during a period of unchanged relative displacement between said print head and said printing media. ---

Allowable Subject Matter

2. Claims 38, 42-43, 47, 59, and 80 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 38, 42-43, 47, 59, and 80 is the inclusion of the limitation of an ink jet print head that includes "wherein each of said local reservoirs is configured to supply ink to nearby ones of said nozzles at atmospheric pressure by capillary action, wherein said capillary action is unaided by compression". It is this limitation found in the claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record, which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LISA M. SOLOMON whose telephone
